

Dear members of WZCC community,

Re: Introducing a Safe Investment and Insurance - \$IRE Strategy

Would you be interested if I showed you a way to?

- Accumulate wealth
- Tax-free earnings
- 100 per cent safety of your retirement savings - having peace of mind
- Freedom from hidden costs of working with stock brokers and bankers
- Earn generous return on your money---5% on average while everyone chases low paying GICs, bonds and T-Bills.

Friends, it has taken me 2 years to research this concept. I call this a \$IRE Strategy (**Safe Investment and Rich Estate**).

\$IRE strategy is for all those that care for every cent of their hard earned. Whether you are wealthy or an average family, who is putting away cash for retirement, the person who is adding monthly to his/her RRSPs, TFSA, or other tax-deferred plans, or for those who have college accounts for their kids (RESP) and for retirees who are afraid whether their money will last as long as they live, \$IRE offers a balance of seven powerful factors:

- Tax shelter
- Asset protection
- A family banking system
- Retire 100% tax free
- Liquidity
- Control
- Guarantee growth and safety for rest of your life

This is a safe way to earn an average 5 per cent **compounded** growth each year, with no tax on earnings. You also save on hidden management fees, brokerage fees, service charges. Your withdrawals are not taxed if rightly set up. Your money in \$IRE strategy is guaranteed to be safe. It will never ever go down, irrespective of what happens in the stock market or the economy.

The first rule in savings is NOT to lose your money. Second rule is to invest wisely in your future growth and happiness. \$IRE strategy protects your life time savings and it grows exponentially.
